If you reply to this message, please retain your serial number in the subject line. This reference,
(THREAD ID:1-4PWYBQ8) (ACTIVITY ID:1-4Q29VLT) will assist us in locating your questions and answers.

Dear Mary,

Thank you for your interest in the American Cancer Society and contacting us for permission to use the information on our website. We truly appreciate your efforts to help educate others at your upcoming women's health education initiative. You are welcome to make one permanent printout of each page of the website to be used for personal, educational and noncommercial uses, which do not harm the reputation of the American Cancer Society.

If you wish to use or copy content from our website for commercial use, please submit your request to permissionrequest@cancer.org.

Please provide the following information with your request:

> Information about the exact ACS material you propose to use or copy, including the title of the document, page numbers, section titles, and copyright dates. To use information from the ACS Web site, include the Web address (URL) and, if possible, attach a copy of the specific information you wish to use.
> An explanation of how the ACS information will be used and/or distributed and whether reprinted materials will be sold
> A description of the nature of your organization or business (for-profit, not-for-profit, etc.)
> Contact information, including your fax number, e-mail address, and/or mailing address

You will receive an email response verifying receipt of the request within two business days. Please allow up to 14 business days for requests to be processed.

If your request is time sensitive, please send it by fax to: 404-417-5808 (Attention: "Reprints")
To learn more about permission to reprint web content, please view our Web Content Use guidelines at:

http://www.cancer.org/docroot/SU/content/SU_1_2_Usage_of_Content.asp?sitearea=SU

Thank you for helping the American Cancer Society in the global fight against cancer!

Ken
Online Cancer Information Specialist

AIII.2 Permission to use CAM in Ireland

RE: The use of CAM in research outside the UK

Anne Helme <Anne.Helme@cancer.org.uk>
Mon 26/11/2012 08:54
To: Mary Reidy <MREIDY@wit.ie>;
Dear Mary,

Thank you for your enquiry. I don’t see that there would be any problems in using CAM in Ireland, but your best approach is probably to request the toolkit (http://www.cancerresearchuk.org/cancer-info/spotcancerearly/naedi/AboutNAEDI/Researchevaluationandmonitoring/naedi_cam/) using this survey: https://survey.cancerresearchuk.org/Survey.aspx?s=c782eab2506841dfa5bade7e9a2b5647 - you can specify your location as being Ireland. If you have any further questions, please contact naedi@cancer.org.uk and my colleagues who oversee the CAM tool should be able to help.

Best wishes,
Anne
Dr Anne Helme
Dear Dr. Helme,

I am in the early stages of a funded MSc by Research in Nursing at Waterford Institute of Technology, Waterford, Ireland. My research is funded by the Health Service Executive. My area of interest is cancer awareness in women with intellectual disabilities in the south east of Ireland. My query is whether CAM can be used outside the UK to measure cancer awareness and if so how is permission sought.

Thank you for your time.

Best Regards
Mary Reidy
BSc, RNID.

AIII.3: Change Picture Bank Licence

6. CHANGE Picture Bank Licence

6.1 Terms of the License

This section of the Terms applies:

(i) if you are purchasing or purchased one of the CHANGE Picture Bank CD-ROMs and Licenses for use, whether a single or multiple user license; and/or
(ii) if you download any individual CHANGE Pictures from our website.

(together "CHANGE Image Resources")

These licence terms may be reproduced in the delivery package with any relevant Product or as part of the software comprising part of the Product.

Please read the following licence terms and conditions carefully. You will be bound by the terms of the licence should you either directly or else through someone acting
on your behalf, purchase, install and/or operate any CHANGE Image Resources for
your own purposes or else purport to dispose of the CHANGE Image Resources.

6.2 Definitions
This License Agreement is between ‘You’ the purchaser of a CHANGE Image
Resources License and the ‘We’, ‘us’ CHANGE Ltd.

6.3 The License
We grant you a personal non-exclusive, non-transferable licence to install and use
the selected CHANGE Image Resources, on the maximum number of terminal/s as
appropriate to the license purchased, on which the CHANGE Image Resources can be
installed at the location of the purchaser. In relation only to CHANGE Pictures, the
maximum number of terminals on which any CHANGE Pictures can be installed is one
(1).

The CHANGE Image Resources may only be run or otherwise operated by your
employees on equipment owned by you. Any further use is prohibited.

You must only use pictures from CHANGE to make information accessible and easy to
understand.

You must give due credit to CHANGE when using pictures from CHANGE including any of
our Picture Banks. This can be via use of our Publisher’s Mark (a copy of which can be
obtained from us by writing to info@change-people.co.uk) or a short reference on the
back cover of documents or at the bottom of web-pages. E.g. ‘all pictures used are from
CHANGE www.changepeople.co.uk’.

If you want to use the pictures from CHANGE to make money e.g. in a document or
product that is going to be for sale through your organisation, you must write to us and
ask our separate permission. We may charge you a commission fee on any reproduction
of our work for commercial gain.

AIII.4 Channel 4 Embarrassing Bodies

To: Claire Cohen
Subject: Permission to use information

Dear Claire,

My postgraduate research study involves the development of an non commercial educational initiative for women with intellectual disabilities and their carers that aims to improve breast and cervical cancer awareness and screening uptake. This is intended to lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

I am interested in using information e.g. videos and cervical cancer information from Jo’s Cervical Cancer Trust website to inform the content of the initiative. I wish to seek permission to use information from Jo’s Cervical Cancer Trust website. Full copyright acknowledgement will be given to Jo’s Cervical Cancer Trust and the content will not be altered in any way. I hope you will consider my request favourably.

Subject: Re: Women be Healthy II curriculum

Dear Mary,

Thank you so much for your interest in the WBH project. I will defer to Karen on the particulars; she has access to the various materials.
You are welcome to use the materials on the website- they are free and everyone is welcome to them. Here is a link to the revised curriculum: http://lurie.brandeis.edu/women/index.html

The link for the curriculum itself is on the left side.

I would be interested in hearing Karen's thoughts, but I recommend that you have 3 sessions per week, each of one hour, in order to fit everything. In our previous work with 7 weekly sessions, we found that the curriculum wasn't effective, particularly in relation to Pap tests. It was moderately effective over the 7 weeks with regard to breast cancer.

I would love to hear more about your work and project as you move forward.

All the best,

Susan
Dear Susan and Karen,

I contacted your team in late 2012 about using modules from the Women be Healthy 2 Educational Programme in the Republic of Ireland. Unfortunately due to delays in ethical approval and recruitment, the educational programme was subsequently delayed, and will now commence in the Summer of 2014. I have accessed the curriculum online and have identified some key areas of interest:

1. The programme delivery in my study is limited to a six week time frame.
2. The field trips would most likely not be feasible nor would bringing radiography students or smeartakers to the classes to meet the women.
3. Sexual health is a taboo subject in Ireland, so I am particularly interested in the DVD of the pelvic and breast exam to encourage the women to talk about breast and cervical health.
4. I am also interested in using the relaxation techniques with the women.
5. Your facebook page is an excellent resource, and I would like to use the clips to encourage the women in the group to take part in screening tests.

I think you and your team have done fantastic work with women with intellectual disabilities. I am a Registered Nurse Intellectual Disability and have 4 years experience in working with women with intellectual disabilities. I would be delighted if you would agree to facilitate my request to use sections of the WBH2 programme in my educational programme.

Best regards,

Mary Reidy,
Postgraduate Research Student,
Department of Nursing,

CAM Toolkits
Cancer Awareness Measure toolkit version 2.1 Updated 09.02.11 This survey instrument (CAM) was developed by Cancer Research UK, University College London, Kings College London, and University of Oxford in 2007-2008.

Cervical Cancer Awareness Measure Toolkit Version 2.1 Updated 09.02.11: This survey instrument (the Cervical CAM) was developed by the UCL Health Behaviour Research Centre, in collaboration with the Department of Health Cancer Team and The Eve Appeal, with funding from The Eve Appeal. It forms part of the Cervical Cancer Awareness and Symptoms Initiative (CCASI). It is based on a generic CAM developed by Cancer Research UK, University College London, King’s College London and Oxford University in 2007-08.

Toolkit (version 2): This survey instrument (Breast CAM) was developed by Cancer Research UK, King’s College London and University College London in 2009 and validated with the support of Breast Cancer Care and Breakthrough Breast Cancer.

CHANGE: ‘all pictures used are from CHANGE www.changepeople.co.uk’.

EMBRACES-ID Cover Picture Credit: Heather Clements, 2013.

NHS Screening Programme: “© Crown Copyright 2014. This information was originally developed by the UK National Screening Committee/NHS Screening Programmes (www.screening.nhs.uk) and is used under the Open Government Licence v2.0”
Appendix IV Phase I Comprehensive Needs Assessment Documentation

AIV.1 E-mail to Intellectual Disability Service Providers Managers

Please find attached the following documents for the WIT/ HSE study 'Cancer awareness and screening in women with intellectual disabilities' as discussed in our recent telephone conversation.

- Invitation letter for families.
- Information sheet for Cancer Awareness Measure questionnaire for carers.
- Information sheet for interviews for carers of women with severe to profound intellectual disabilities.
- Accessible Cancer Awareness Measure information sheet for women with mild to moderate ID.
- Consent sheet for women with mild to moderate ID.
- Cancer awareness measure questionnaire.

The following sections provide further details about the people I would like to talk to during the study.

(a) **Women with mild to moderate ID** who are interested in participating would complete an adapted Cancer Awareness Measure (CAM) questionnaire with me. I would arrange to come to meet them at the day service- it takes about 10-15 minutes. We would hope that **as many women with ID as possible** would participate as it is important to assess the cancer awareness and screening knowledge of women with ID and the women with ID are best placed to provide this information.

The inclusion criteria for the women with ID in the Adapted CAM interviews are to:

- have a diagnosis of mild to moderate ID;
- demonstrate an understanding of the project;
- have expressive language skills;
- 20 years and over.

(b) **Staff and families who support women with ID** are asked to complete a CAM questionnaire (around 10 minutes) anonymously to gather an awareness of staff and family knowledge about cancer awareness and screening. We would anticipate that **as many staff and families as possible** would participate. It is a key focus of this study to assess family awareness of cancer and screening programmes. The CAM is available in print version, online version and is also possible to complete over the phone with a member of the research team.

(c) **Staff and families supporting women with severe to profound intellectual disabilities** are invited to an individual interview offer their perspectives on issues relating to cancer awareness and screening participation for women with severe to profound ID. I would arrange a date to meet interested parties for a recorded interview.

I look forward to hearing from you in the near future.
AIV.2 Follow up invitation to Service Managers

To whom it may concern,

Waterford Institute of Technology/ HSE are carrying out research about breast and cervical cancer and screening awareness in women with intellectual disabilities in the South East. We would like to talk to women and their carers about breast and cervical cancer and screening awareness. The results will be used to develop education programmes for the women and their carers to increase screening uptake for women with intellectual disabilities. This is intended to lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

A Cancer Awareness Measure survey of staff and family members will help us to assess their personal cancer and screening awareness. The survey can be completed online, over the telephone or as a printed version, and should take about 20 minutes to complete.

Individual interviews will help us to assess the carer’s views of the needs on women with severe to profound intellectual disabilities in relation to cancer awareness and screening. These carer interviews should take between 30-45 minutes.

Please do not hesitate to contact me if you have any further queries about this project. I look forward to working with you during this project.

Kind regards,
Mary Reidy,
Postgraduate Research Student.
Would you like to tell us what you know about breast and cervical cancer awareness and screening?

What's the project about?
Waterford Institute of Technology/HSE are carrying out research about breast and cervical cancer awareness and screening in women with ID in the South East. We would like to talk to the women and their carers about breast and cervical cancer and screening awareness.

The results will be used to develop education programmes for the women and their carers to increase screening uptake for women with ID. This is intended to lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

What would I need to do?
(a) You would complete a questionnaire on breast and cervical cancer awareness and screening either online or over the telephone which takes about 20 minutes.

OR

(b) You would take part in an interview for around 45 minutes to explore the needs of the women about breast and cervical cancer awareness and screening.

Are you interested in taking part?
There will be an information session on dd/mm/yyyy where I will answer any questions you may have about the project. I'm also available to answer telephone or e-mail queries about the project.

Mary Reidy,
Postgraduate Student,
Postgraduate Research Unit,
Department of Nursing,
School of Health Science,
WIT,
Cork Road,
Waterford
My name is Mary. I am doing a course at WIT. I am doing a research project.

I would like to have a chat about what you know about cancer and the tests that check for cancer. I won't be doing any tests on you.

The chat will take no longer than half an hour.

You can say yes or no. It is up to you if you want you take part.

If you would like to know more about taking part:

I'll be here of dd/mm/yyyy to talk to people at the centre about the project.

You can phone me at 051 845593
AIV.5 Carers CAM information sheets (online and telephone version)

Project Title: Cancer Awareness and Screening in Women with Intellectual Disabilities (ID)

You are being invited to take part in a research project. Before you decide whether or not to take part, it is important for you to understand why the research is being done and what it will involve. Please take the time to read the following information carefully.

What is the purpose of the project?
Waterford Institute of Technology/ HSE are carrying out research about breast and cervical cancer and screening awareness in women with ID in the South East. We would like to talk to the women and their carers about breast and cervical cancer and screening awareness. The results will be used to develop education programmes for the women and their carers to increase screening uptake for women with ID. This is intended to lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

Why have I been invited to take part?
You have been invited to take part because you are a family member or work with a woman with ID. We would like to know about your own breast and cervical cancer and screening awareness to help us to develop the health education programmes.

Do I have to take part?
It is up to you whether you decide to take part, taking part is voluntary.

What would I have to do?
You would not be required to take part in any medical tests. If you decide to take part, you would complete a questionnaire about breast and cervical cancer awareness and screening. The questionnaire is available to complete online and returned to mreidy@wit.ie. It would be best to complete the questionnaire without checking the internet or books for the answers as we are interested in your opinion. Alternatively, the questionnaire can be completed over the telephone at a time that suits you. The research team will make arrangements to phone you at that time.

If you have any questions about symptoms you have had or other questions about cancer after completing the questionnaire, please speak to your GP.

Confidentiality
The answers you give will be given a specific code and it will not be possible for you to be identified from your answers. All the information that is collected will be anonymous and kept strictly confidential and your name will never be used with this information.

What happens to the information that is collected?
The answers you give will be given a specific code and it will not be possible for you to be identified from your answers. This coded information will be sent to the UK Data Archive. The archive will help us to build an understanding of public knowledge about cancer so that we can develop ways to improve communications and services that aim to improve cancer outcomes. More information about the archive can be found here: http://www.datarchive.ac.uk/Introduction.asp

If you have any questions about symptoms you have had or other questions about cancer after completing the questionnaire, please speak to your GP.

Confidentiality
The answers you give will be given a specific code and it will not be possible for you to be identified from your answers. All the information that is collected will be anonymous and kept strictly confidential and your name will never be used with this information.

What happens to the information that is collected?
The answers you give will be given a specific code and it will not be possible for you to be identified from your answers. This coded information will be sent to the UK Data Archive. The archive will help us to build an understanding of public knowledge about cancer so that we can develop ways to improve communications and services that aim to improve cancer outcomes. More information about the archive can be found here: http://www.dataarchive.ac.uk/Introduction.asp

Thank you for taking the time to read this information sheet
You are being invited to take part in a research project. Before you decide whether or not to take part, it is important for you to understand why the research is being done and what it will involve. Please take the time to read the following information carefully.

What is the purpose of the study?
Waterford Institute of Technology/ HSE are carrying out research about breast and cervical cancer awareness and screening in women with ID in the South East. We would like to talk to the women and their carers about breast and cervical cancer awareness and screening. The results will be used to develop education programmes for the women and their carers to increase screening uptake for women with ID. This is intended to lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

Why have I been invited to take part?
You have been invited to participate because you work with/ or are a family member of a woman with severe to profound intellectual disabilities. We would like to talk to you about what you think are the women’s needs about breast and cervical cancer awareness and screening.

Do I have to take part?
It is up to you whether you decide to take part, taking part is voluntary. You are free to withdraw at any time without giving a reason.

What would I have to do?
If you do decide to take part, you would take part in a taped interview to gather information on your views of the needs of the women about breast and cervical cancer awareness and screening. The information gathered would be used to design the education programme for the women and their carers. You would not be required to take part in any medical tests.

Confidentiality
All the information that is collected will be kept strictly confidential your name will never be used with this information. Only the research team will have access to the information.

Thank you for taking the time to read this information sheet
My name is Mary. I am doing a course at WIT. I am doing a research project.

I would like to hear about what you know about cancer and the tests that check for cancer. I won’t be doing any tests on you.

The two of us would have a chat about what you know about cancer and the tests to check for cancer.

If you have any questions about symptoms you have had or other questions about cancer, you can talk to the nurse educator at your centre. You and the nurse educator can also
arrange a chat with your GP.

I will let your GP know that you have taken part in the project.

To help other people doing projects about cancer and tests, your answers will be put in a computer. Don’t worry nobody will know the answers are from you.

You can ask for our chat to stop at any time.

The chat will take no longer than half an hour.

You can say yes or no. It is up to you if you want you take part.
If you do want to take part, please ask your keyworker or family to help you read the consent form.

If you would like to talk to me, you should sign the consent form with Mary and your keyworker.

If you would like to know more about the project, please ring me at (051) 845593.

Thank you for taking the time to read this information leaflet.
AIV.9 Carers interview consent form

Project Title: Cancer Awareness and Screening in Women with Intellectual Disabilities

Please insert your initials in the box opposite each statement:

I have read and understand the information leaflet for the study and have had the opportunity to ask questions all of which have been satisfactorily answered.

I understand that taking part in the study is voluntary and that I am free to leave the study at any time without giving a reason.

I agree to take part in the study.

I agree to the interview being tape recorded.

I understand that all information I give will be confidential.

I understand my name or information which might identify me will not be used in any publications.

Participants Signature                             Date                              Name in block capitals

________________________________________  ______________  _______________________
Researchers Signature                              Date                              Name in block capitals
CONSENT FORM

Cancer Awareness and Screening in Women with ID.

If I talk to Mary about her project “Cancer Awareness and Screening in Women with ID”

I understand that the chat with Mary will be recorded.

I understand that the chat with Mary will be in private.

I understand that I can stop the chat with Mary at any time.
If you understand these three sentences, you now can decide if you would like to take part in the project.

I have decided that I would like to talk to Mary about her project “Cancer awareness and screening in women with ID”

Please put a circle around Yes or No.

Cork Road,  
Waterford City.  
051-  845593  
mreidy@wit.ie  
(date).

To whom it may concern,

Waterford Institute of Technology/ HSE are carrying out research about breast and cervical cancer and screening awareness in women with intellectual disabilities in the South East. We would like to talk to women and their carers about breast and cervical cancer and screening awareness. The results will be used to develop education programmes for the women and their carers to increase screening uptake for women with intellectual disabilities. This is intended to lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

An information meeting for women with intellectual disabilities, their families, and members of staff at the (name of service) will be held at (time) on (date). The meeting will be held in (where). Two posters are available for your centre to advertise the meeting. An invitation letter to the meeting for the families is also included, so it would be great if you could arrange for this letter to be distributed to the families.

I look forward to meeting with you on the night to answer any questions you may have about the project.

Kind regards,  
Mary Reidy,  
Postgraduate Research Student.
AIV.12 Powerpoint Presentation for Information Meetings

Information Meeting
Brothers of Charity, Waterford
11th June 2013

The two of us would have a chat about what you know about cancer and the tests to check for cancer.

If you would like to talk to me, you should sign the consent form with me and your keyworker or family.

My name is Mary. I am doing a research project at Waterford Institute of Technology.

The chat will take no longer than half an hour.

Thank you

I would like to hear about what you know about cancer and the tests that check for cancer.

I won’t be doing any tests on you.

You can say yes or no. It is up to you if you want you take part.
Cancer awareness and screening in women with intellectual disabilities

Wednesday, 3rd October 2013

Invitation to families to participate in a research study exploring cancer awareness and screening in women with intellectual disabilities.

What is the research about?

Waterford Institute of Technology in collaboration with the HSE SE are carrying out research about breast and cervical cancer awareness and screening in women with intellectual disabilities in the South East region.

The members of the research team are Dr. Susanne Gantelke, Ms. Sinéad Foran and Ms Mary Reddy from the Department of Nursing at Waterford Institute of Technology.

As part of this research study we are asking the families of women with intellectual disabilities to participate in a survey about cancer awareness and screening. The results of the survey will be used to develop education programmes to improve screening uptake for women with intellectual disabilities. This may lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

What would you need to do?

There are no medical tests involved. If you decide to take part you would complete a questionnaire on cancer awareness and screening. The questionnaire takes about 15 minutes to complete.

You can complete the questionnaire over the telephone at a time that suits you. The research team will make arrangements to phone you at that time.

If you would rather complete a paper copy of the questionnaire, we will send you a copy, as well as a stamped addressed return envelope.

You also have the option of completing an online version of the questionnaire which is available from mreathy@wit.ie

Confidentiality

All the information that is collected will be anonymous and kept strictly confidential and your name will never be used with this information.

If you are interested in taking part in this research, please contact Ms Mary Reddy, at the Department of Nursing at Waterford Institute of Technology.

E-mail: mreathy@wit.ie Phone: (051) 845593
Invitation to families to participate in a research study exploring cancer awareness and screening in women with intellectual disabilities.

What is the research about?
Waterford Institute of Technology in collaboration with the HSE-SE are carrying out research about breast and cervical cancer awareness and screening in women with intellectual disabilities in the South East region.

The members of the research team are Dr. Suzanne Denieffe, Ms. Sinéad Foran and Ms Mary Reidy from the Department of Nursing at Waterford Institute of Technology.

As part of this research study we are inviting the families of women with intellectual disabilities to participate in a survey about cancer awareness and screening. The survey will begin in early October and finish in mid December 2013. The results of this survey will be used to develop education programmes to improve screening uptake for women with intellectual disabilities. This may lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

What would you need to do?
There are no medical tests involved. If you decide to take part you would complete a questionnaire on cancer awareness and screening. The questionnaire takes about 15 minutes to complete.

AIV.14 Carers CAM

Project Title: Cancer Awareness and Screening in Women with Intellectual Disabilities.

Please complete the Cancer Awareness Measure (CAM) for this project online. It should take 20 minutes. Your opinion is important to us.

Please do not alter the CAM questions in any way.

It would be best to complete the survey without checking the internet or books for the answers as we are interested in your opinion.

The questionnaire is comprised of four sections.

Section A: Breast Cancer Awareness Measure.
Section B: Cervical Cancer Awareness Measure.
Section C: Cancer Awareness Measure.
Section D: Demographic Questions.

Please remember to save your answers after each section of the CAM.

Please remember to attach the completed CAM questionnaire to the email.

Please return the completed CAM questionnaire to mreidy@wit.ie by dd/mm/yyyy.

Your email address will be deleted on receipt of the completed CAM questionnaire by Mary Reidy so that your answers remain confidential.

Thank you for your time.
Section A: Breast Cancer Awareness Measure

Toolkit (version 2)

This survey instrument (Breast CAM) was developed by Cancer Research UK, King’s College London and University College London in 2009 and validated with the support of Breast Cancer Care and Breakthrough Breast Cancer.

Instructions for completion of the Breast-CAM

1. Please do not alter any of the information in the CAM questionnaire.
2. Please answer each question in the CAM, we are interested in your opinion.
Q1: The following may or may not be warning signs for breast cancer. We are interested in your opinion. Please indicate your answer with an X.

<table>
<thead>

Section B: Cervical Cancer Awareness Measure

Cervical Cancer Awareness Measure Toolkit Version 2.1 Updated 09.02.11

This survey instrument (the Cervical CAM) was developed by the UCL Health Behaviour Research Centre, in collaboration with the Department of Health Cancer Team and The Eve Appeal, with funding from The Eve Appeal. It forms part of the Cervical Cancer Awareness and Symptoms Initiative (CCASI). It is based on a generic CAM developed by Cancer Research UK, University College London, King’s College London and Oxford University in 2007-08.

Instructions for completion of the Cervical- CAM

1. Please do not alter any of the information in the CAM questionnaire.
2. Please answer each question in the CAM, we are interested in your opinion.
Q1. The following may or may not be warning signs for cervical cancer. We are interested in your opinion: Please indicate your answer with an X.

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>Don’t know</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do you think vaginal bleeding between periods could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think persistent lower back pain could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think persistent vaginal discharge which smells unpleasant could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think discomfort or pain during sex could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think menstrual periods that are heavier of longer than usual could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think persistent diarrhoea could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think vaginal bleeding after the menopause could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>

Q2b. Are you confident you would notice a change in your breasts? Please indicate your answer with an X.

<table>
<thead>
<tr>
<th>Not at all confident</th>
<th>Not very confident</th>
<th>Fairly confident</th>
<th>Very confident</th>
</tr>
</thead>
</table>

Q2c. Have you ever been to see a doctor about a change you have noticed in one of your breasts? Please indicate your answer with an X.

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
<th>Never noticed a change in one of my breasts</th>
</tr>
</thead>
</table>

Q3. If you found a change in your breast, how soon would you contact your doctor to make an appointment to discuss it? Please type your answer below.

---

46
### Q4. In the next year, who is most likely to develop breast cancer? Please indicate your opinion with an X

- A 30 year old woman
- A 50 year old woman
- A 70 year old woman
- A woman of any age

### Q5. What things do you think affect a woman’s chance of developing breast cancer? Please type your answer in this box.
Q6a. As far as you are aware is there a national breast screening programme in Ireland? Please indicate your answer with an X.

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
<th>Don’t know</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

If your answer to Q. 6a was yes, please answer the following two questions, otherwise please go to Q 6b

If yes, at what age are women first invited for breast screening?

<table>
<thead>
<tr>
<th>Age</th>
<th>Don’t know</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

If yes, at what age are women last invited for breast screening?

<table>
<thead>
<tr>
<th>Age</th>
<th>Don’t know</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Q6b. Have you ever been invited for breast screening on the national breast screening programme? Please indicate your answer with an X.

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
<th>Don’t know</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

6c. Have you ever had breast screening on the national breast screening programme? Please indicate your answer with an X.

<table>
<thead>
<tr>
<th>Yes</th>
<th>No</th>
<th>Don’t know</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>

Section B: Cervical Cancer Awareness Measure

Cervical Cancer Awareness Measure Toolkit Version 2.1 Updated 09.02.11

This survey instrument (the Cervical CAM) was developed by the UCL Health Behaviour Research Centre, in collaboration with the Department of Health Cancer Team and The Eve Appeal, with funding from The Eve Appeal. It forms part of the Cervical Cancer Awareness and Symptoms Initiative (CCASI). It is based on a generic CAM developed by Cancer Research UK, University College London, King’s College London and Oxford University in 2007-08.

**Instructions for completion of the Cervical- CAM**

3. Please do not alter any of the information in the CAM questionnaire.
4. Please answer each question in the CAM, we are interested in your opinion.
Q1. The following may or may not be warning signs for cervical cancer. We are interested in your opinion: Please indicate your answer with an X.

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>Don’t know</th>
</tr>
</thead>
<tbody>
<tr>
<td>Do you think vaginal bleeding between periods could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think persistent lower back pain could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think persistent vaginal discharge which smells unpleasant could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think discomfort or pain during sex could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think menstrual periods that are heavier of longer than usual could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think persistent diarrhoea could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think vaginal bleeding after the menopause could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think persistent pelvic pain could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think vaginal bleeding during or after sex could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think blood in the stool or urine could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Do you think unexplained weight loss could be a sign of cervical cancer?</td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
Q2. How confident are you that you would notice a cervical cancer symptom? Please indicate your answer with an X.

<table>
<thead>
<tr>
<th>Not at all confident</th>
<th>Not very confident</th>
<th>Fairly confident</th>
<th>Very confident</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

Q3. If you had a symptom that you thought might be a sign of cervical cancer how soon would you contact your doctor to make an appointment to discuss it? Please type your answer below.
Q4. In the next year, who is most likely to develop cervical cancer? Please indicate your answer with an X

<table>
<thead>
<tr>
<th>Option</th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>A woman aged 20-29 years</td>

</table>

Section C: Cancer Awareness Measure

This survey instrument (CAM) was developed by Cancer Research UK, University College London, Kings College London, and University of Oxford in 2007-2008.

Instructions for completion of the CAM

3. Please do not alter any of the information in the CAM questionnaire.
4. Please answer each question in the CAM, we are interested in your opinion.
Q1. Sometimes people put off going to see the doctor, even when they have a symptom that they think might be serious. Could you say if any of these might put you off going to see the doctor?

<table>
<thead>
<tr>
<th></th>
<th>Yes Often</th>
<th>Yes sometimes</th>
<th>No</th>
<th>Don't know</th>
</tr>
</thead>
<tbody>
<tr>
<td>I would be embarrassed</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>I would be scared</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>I would be worried about wasting the doctor’s time</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>My doctor would be difficult to talk to</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>It would be difficult to make an appointment with my doctor</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>I would be too busy to make time to go to the doctor</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>I have too many other things to worry about</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>It would be difficult for me to arrange transport to the doctor’s surgery</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>I would be worried about what the doctor might find</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>I wouldn’t feel confident talking about my symptom with the doctor</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Other (please specify)</td>
<td></td>
<td></td>
<td></td>
<td></td>
</tr>
</tbody>
</table>
**Section D: Demographic Questions**

We would now like to ask you a few questions about yourself. This will help us to analyse the results of the survey. The data collected will help us to identify specific age or demographic groups of people who are in need of more information about cancer. You will not be asked your name and all of your answers will be kept strictly confidential and anonymous. Your personal data will be held in accordance with the Data Protection Act 1988-2003.

1. What is your age?
   - [ ] Prefer not to say

2. What is your gender?
   - [ ] Male
   - [ ] Female
   - [ ] Prefer not to say

3: What is your carer status?
   - [ ] Family Carer
   - [ ] Health Care Assistant
   - [ ] Nurse
   - [ ] Social Care Worker
   - [ ] Other
   - [ ] Prefer not to say
4. Have you, your family or close friends had cancer?

<table>
<thead>
<tr>
<th></th>
<th>Yes</th>
<th>No</th>
<th>Don't know</th>
<th>Prefer not to say</th>
</tr>
</thead>
<tbody>
<tr>
<td>You</td>

Thank you for your time.
AIV.16 Carers Interview Topic Guide

Question 1: What is your own understanding of breast cancer awareness and screening?

Question 2: What is your own understanding of cervical cancer awareness and screening?

Question 3: Have you had to deal with issues such as participation in screening with the women?

Question 4: What do you think would be useful to help you assist women with severe to profound ID in relation to breast and cervical cancer awareness?

Question 5: What do you think would be useful to help you assist women with severe to profound ID in relation to participate in screening programmes?
Dear Dr. x

Waterford Institute of Technology/ HSE are carrying out research about breast and cervical cancer awareness and screening in women with intellectual disabilities in the South East. We are talking to the women with intellectual disabilities and their carers about breast and cervical cancer awareness and knowledge of screening programmes. The results will be used to develop education programmes for the women and their carers to increase cancer awareness and improve screening uptake. This is intended to lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

Your patient, x, (service name) Waterford, has completed a questionnaire about breast and cervical cancer awareness and screening programmes. x has been advised to contact her GP in collaboration with the nurse educator in her services should she have any concerns about breast or cervical cancer following her participation in this study. This is in accordance with the requirements of the HSE- South Research Ethics Committee approval for this study.

Yours sincerely,

Mary Reidy, Postgraduate Research Student.

AV.2 Introductory email for intellectual disability service providers:
EMBRACES-ID

A research team based at the Department of Nursing and Health Care at Waterford Institute of Technology Dr. Suzanne Denieffe, Ms Sinéad Foran and Ms Mary Reidy in collaboration with the HSE are carrying out research about cancer awareness and screening in women with intellectual disabilities in the South East. We have talked to the women, staff and family carers about breast and cervical cancer awareness and screening. The results were used to develop a cancer awareness programme.

We would like invite your service to take part in EMBRACES-ID (Early Monitoring of Breast and Cervical Cancer Signs & Screening in Intellectual Disabilities), a four week programme designed for women with mild to moderate intellectual disabilities, staff and family carers. The programme aims to raise the awareness of
a) cancer warning signs;
b) risk factors;
c) screening programmes;
d) promote early help seeking on discovery of a symptom of breast or cervical cancer.

The group programme will be delivered by Ms. Mary Reidy in a supportive learning environment at your day centre. All materials for the programme will be provided. Each woman with an intellectual disability who is willing and able to participate would be accompanied by the same staff/family member to each of the four two- hour education sessions. There are no medical tests involved.

In order to help us to evaluate the programme, each participant is also invited to attend short interviews. These interviews will take place the week before the programme starts; at the end of the programme and again 3 months post completion of the programme.

The training will commence in mid -September 2014. Recruitment to the programme is now open. We look forward to hearing from you.
AV.3 Carers poster advertisement

EMBRACES-ID (Early Monitoring of Breast and Cervical Cancer Signs & Screening in Intellectual Disabilities)

What's the project about?

EMBRACES-ID is a programme designed for women with intellectual disabilities, staff and family carers.

The programme aims to raise the awareness of:

- cancer warning signs
- risk factors
- screening programmes
- promote early help seeking on discovery of a symptom of breast or cervical cancer.

What would I need to do?

Staff, family carers and women using the service would participate in a weekly group training session for four weeks. Each training session lasts for two hours. The sessions are run at the service and will begin in September 2014.

AND

You would help us evaluate the training by taking part in interviews before and after the training and again 3 months after the training has ended.

Are you interested in taking part?

Contact: Mary Reidy
Phone: (051) 845593 or e-mail mreidy@wit.ie

Mary Reidy,
PhD Candidate,
Postgraduate Research Unit,
Department of Nursing,
School of Health Science,
WIT,
Cork Road,
Waterford
My name is Mary. I am doing a course at WIT. I am doing a research project.

I am going to give classes about cancer and the tests to check for cancer. These classes are for the women using the service, their families and staff.

There are 4 classes. Each class takes 2 hours a week.

You can say yes or no. It is up to you if you want you take part.

If you would like to know more about taking part:

You can phone me at 051 845593

You can email me at mreidy@wit.ie
AV.5 Carers information sheet

CARER INFORMATION LEAFLET

EMBRACES-ID (Early Monitoring of Breast and Cervical Cancer Signs & Screening in Intellectual Disabilities).

You are being invited to take part in a research project. Before you decide whether or not to take part, it is important for you to understand why the research is being done and what it will involve. Please take the time to read the following information carefully.

What is the purpose of the study?
Waterford Institute of Technology/ HSE are carrying out research about breast and cervical cancer awareness and screening in women with intellectual disabilities in the South East. We talked to the women and their carers about breast and cervical cancer awareness and screening. The results were used to develop an education programme for the women and their carers to raise cancer awareness. This is intended to lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

Why have I been invited to take part?
You have been invited to participate because you work with/ or are a family member of a woman with mild to moderate intellectual disabilities. We would like to invite you to take part in the educational programme about breast and cervical cancer awareness and screening programmes.

Do I have to take part?
It is up to you whether you decide to take part, taking part is voluntary. You are free to withdraw at any time without giving a reason.

What would I have to do?
If you do decide to take part
- You would participate in a weekly group training session for four weeks. Each session lasts for two hours.
- You would help us evaluate the training by taking part in interviews before and after the training and again 3 months after the training has ended.
- You would not be required to take part in any medical tests.

If you have any questions about symptoms you have had or other questions about cancer, please speak to your GP.

Confidentiality
All the information that is collected will be kept strictly confidential your name will never be used with this information. Only the research team will have access to the information.

What happens to the information that is collected?
The answers you give will be given a specific code and it will not be possible for you to be identified from your answers. This coded information will be sent to the UK Data Archive. The archive will help us to build an understanding of public knowledge about cancer so that we can develop ways to improve communications and services that aim to improve cancer outcomes. More information about the archive can be found here: http://www.dataarchive.ac.uk/Introduction.asp

Phone: (051) 845593

Thank you for taking the time to read this information sheet.
My name is Mary. I am doing a course at WIT. I am doing a research project.

I am going to give some classes at __________ about cancer and the tests to check for cancer.

The two of us would have a chat about what you know about cancer and the tests to check for cancer.

If you have any questions about symptoms you have had or other questions about cancer, you can talk to ____________ at your centre. You and
I can also arrange a chat with your GP.

I will let your GP know that you have taken part in the project.

To help other people doing projects about cancer and tests, your answers will be put in a computer. Don’t worry nobody will know the answers are from you.

You can ask for our chat to stop at any time.

The chat will take no longer than half an hour.

I will be giving 4 classes at ___________ about ___________
cancer and the tests to check for cancer to women.

After all the classes are over I will have two more chats with you to see what you know about cancer and the tests to check for cancer.

After the classes are finished if you have any questions about symptoms you have had or other questions about cancer, you can talk to __________ at your centre. You and __________ can also arrange a chat with your GP.

I will let your GP know that you have taken part in the project.
You can say yes or no. It is up to you if you want you take part.

If you do want to take part, please ask your keyworker or family to help you read the consent form.

If you would like to talk to me, you should sign the consent form with Mary and your keyworker.

If you would like to know more about the project, please ring me at (051) 845593.

Thank you for taking the time to read this information leaflet.

EMBRACES-ID (Early Monitoring of Breast and Cervical Cancer Signs & Screening in Intellectual Disabilities)

An Education Programme for Women with Intellectual Disabilities, Staff and Family Carers

Cancer Awareness Measure
Please complete the Cancer Awareness Measure (CAM) for this project. It should take 20 minutes. Your opinion is important to us.

Please do not alter the CAM questions in any way.

It would be best to complete the survey without checking the internet or books for the answers as we are interested in your opinion.

The questionnaire is comprised of four sections.

Section A: Breast Cancer Awareness Measure.
Section B: Cervical Cancer Awareness Measure.
Section C: Cancer Awareness Measure.
Section D: Demographic Questions.

Please return the completed CAM questionnaire to Ms Mary Reidy.

Thank you for your time.
Section A: Breast Cancer Awareness Measure

Toolkit (version 2)

This survey instrument (Breast CAM) was developed by Cancer Research UK, King’s College London and University College London in 2009 and validated with the support of Breast Cancer Care and Breakthrough Breast Cancer.

Section D: Demographic Questions

We would now like to ask you a few questions about yourself. This will help us to analyse the results of the survey. The data collected will help us to identify specific age or demographic groups of people who are in need of more information about cancer. You will not be asked your name and all of your answers will be kept strictly confidential and anonymous. Your personal data will be held in accordance with the Data Protection Act 1988-2003.

Section B: Cervical Cancer Awareness Measure

This survey instrument (the Cervical CAM) was developed by the UCL Health Behaviour Research Centre, in collaboration with the Department of Health Cancer Team and The Eve Appeal, with funding from The Eve Appeal. It forms part of the Cervical Cancer Awareness and Symptoms Initiative (CCASI). It is based on a generic CAM developed by Cancer Research UK, University College London, King’s College London and Oxford University in 2007-08.

Instructions for completion of the Cervical- CAM

7. Please do not alter any of the information in the CAM questionnaire.
8. Please answer each question in the CAM, we are interested in your opinion.
Q1. The following may or may not be warning signs for cervical cancer. We are interested in your opinion: Please indicate your answer with an X. (Pictures 1-11)

<table>

Thank you for taking the time to complete this questionnaire.
EMBRACES-ID (Early Monitoring of Breast and Cervical Cancer Signs & Screening in Intellectual Disabilities)

An Education Programme for Women with Intellectual Disabilities, Staff and Family Carers

INTERVIEW PROTOCOL
EMBRACES-ID (Early Monitoring of Breast and Cervical Cancer Signs & Screening in Intellectual Disabilities).

You are being invited to take part in a research project. Before you decide whether or not to take part, it is important for you to understand why the research is being done and what it will involve. Please take the time to read the following information carefully.

What is the purpose of the study?
Waterford Institute of Technology/ HSE are carrying out research about breast and cervical cancer awareness and screening in women with intellectual disabilities in the South East. We talked to the women and their carers about breast and cervical cancer awareness and screening. The results were used to develop an education programme for the women and their carers to raise cancer awareness. This is intended to lead to the earlier diagnosis and treatment of cancer with better outcomes for the women.

Why have I been invited to take part?
You have been invited to participate because you work with/ or are a family member of a woman with mild to moderate intellectual disabilities. We would like to invite you to take part in the educational programme about breast and cervical cancer awareness and screening programmes.

Do I have to take part?
It is up to you whether you decide to take part, taking part is voluntary. You are free to withdraw at any time without giving a reason.

What would I have to do?
If you do decide to take part
- You would participate in a weekly group training session for four weeks. Each session lasts for two hours.
- You would help us evaluate the training by taking part in interviews before and after the training and again 3 months after the training has ended.
- You would not be required to take part in any medical tests.

If you have any questions about symptoms you have had or other questions about cancer, please speak to your GP.

Confidentiality
All the information that is collected will be kept strictly confidential your name will never be used with this information. Only the research team will have access to the information.

What happens to the information that is collected?
The answers you give will be given a specific code and it will not be possible for you to be identified from your answers. This coded information will be sent to the UK Data Archive. The archive will help us to build an understanding of public knowledge about cancer so that we can develop ways to improve communications and services that aim to improve cancer outcomes. More information about the archive can be found here: http://www.dataarchive.ac.uk/Introduction.asp

Thank you for taking the time to read this information sheet
Project Title: EMBRACES-ID (Early Monitoring of Breast and Cervical Cancer Signs and Screening in Intellectual Disabilities)

Please insert your initials in the box opposite each statement:

- I have read and understand the information leaflet for the study and have had the opportunity to ask questions all of which have been satisfactorily answered.

- I understand that taking part in the study is voluntary and that I am free to leave the study at any time without giving a reason.

- I agree to take part in the study.

- I agree to the interview being tape recorded.

- I understand that all information I give will be confidential.

- I understand my name or information which might identify me will not be used in any publications.

**Instructions for the completion of the survey**

Please answer the following nine questions about cancer prevention, cancer screening and your own personal experience of breast self examination.

Please do not alter the questions in any way

It would be best to complete the survey without checking the internet or books for the answers as we are interested in your opinion.

Please return the completed survey to Ms Mary Reidy in the stamped addressed envelope provided on or before / /

AV.13 GP letter for women with intellectual disabilities participating in the intervention

Private and Confidential

Subject: Cancer Awareness and Screening in Women with Intellectual Disabilities

To: Dr.

Fax No.:

From: Mary Reidy,

Postgraduate Research Office,

Department of Nursing,

School of Health Sciences,

Waterford Institute of Technology.

Total no. of pages: 2
Dear Dr. x

Waterford Institute of Technology/ HSE are carrying out research about breast and cervical cancer awareness and screening in women with intellectual disabilities in the South East. Last year we surveyed women with intellectual disabilities and their carers about cancer awareness and knowledge of screening programmes. The results of the survey were used to develop an education programme for the women and their carers.

Your patient, x, (name of service), is participating in the education programme. x has been advised to contact her GP in collaboration with the nurse educator in her services should she have any concerns about breast or cervical cancer following her participation in this study. This is in accordance with the requirements of the HSE- South Research Ethics Committee approval for this research. Please do not hesitate to contact me should you require further information about the research.

Yours sincerely,

Mary Reidy,
Postgraduate Research Student

Appendix VI EMBRACES-ID Programme Material

AVI.1 EMBRACES-ID Programme Booklet

EMBRACES-ID (Early Monitoring of Breast and Cervical Cancer Signs & Screening in Intellectual Disabilities)

An Education Programme for Women with Intellectual Disabilities, Staff and Family Carers
What is cancer?
What is cancer?

Your body is made up of lots of tiny pieces called cells.

Sometimes these cells can go wrong.

One cell might go wrong which can affect other cells and turn into a lump. This is called a *tumour*. 
What is cancer?

Some tumours are ‘benign’. This means they are not cancer.

‘Malignant’ tumours grow and their cells spread to different parts of the body.

This is called cancer. Cancer can make you feel unwell.
What is cancer?

More than **one in three** people are diagnosed with cancer in their lives.

You can’t catch cancer from anyone or give it to anyone either.

This means you are more likely to get some types of cancer if there is a history of cancer in your family.
What is cancer?

You might feel worried about getting cancer because of this. Talk to your doctor about your worries.

Make sure you go for any screening you are offered and annual health checks.

Keep a look out for any changes in your body that are different from usual.
What is cancer?

It is important that any changes are checked by your doctor as soon as possible.

You might be worried about seeing your doctor.

You might be worried that if you have cancer you will die.
What is cancer?

Cancer is a serious illness but there are lots of people who make a full recovery.

However, some people who get cancer do die.

When a person gets cancer they will need to go to a hospital for treatment.
What is cancer?

Sometimes the treatment will make them better.

Sometimes the treatment will help them to live longer.

Sometimes the treatment will help them to feel more comfortable and have less pain.
Spotting cancer early
Spotting cancer early

There are special tests called screening that can pick up the signs of cancer early.

It is very important to go for regular screening even if you feel healthy and have no symptoms.

Choosing to go for screening you are offered is part of staying healthy.
Spotting cancer early gives you the best chance of treating the disease and getting well again.

There are signs and symptoms to look out for that can be caused by cancer.

Sometimes these signs and symptoms are caused by other illnesses. It is important that you go to have them checked.
Staying healthy
Changes you can make to stay healthy

You can reduce your risk of getting cancer by making changes to how you live your life.

There are certain things you can do to keep yourself healthy. These are:
Changes you can make to stay healthy

Stop smoking. Smoking is the biggest cause of cancer in the world.

Cut down on the amount of alcohol you drink.

All types of alcohol including: beer, wine and spirits increase your risk of getting cancer.
Changes you can make to stay healthy

Do not drink more than one standard drink per day. For example, one glass of beer is a standard drink.

If you are overweight you increase your risk of getting cancer.

The more active you are the more you reduce your risk of cancer.
Changes you can make to stay healthy

So it is important for you to exercise and keep fit.

Walking

Swimming
Changes you can make to stay healthy

Eating a healthy diet can help keep you fit and reduce your risk of cancer.

It is important to eat a balanced diet with plenty of fibre, fruit and vegetables.

Cut down on eating red meat and foods with lots of fat, salt and sugar in them.
Changes you can make to stay healthy

Some infections are passed on by having unprotected sex.

It is best to always use a condom.

Girls aged between 12 and 18 are offered a vaccine which protects against 2 types of HPV.
Changes you can make to stay healthy

There are special tests called screening that can pick up signs of cancer early.

It is important to go for regular screening. Finding out early could save your life.
Breast cancer
The most common cancer for women is breast cancer.
What affects my risk of getting breast cancer?
What affects my risk of getting breast cancer?

Women of any age can get breast cancer. The risk is higher when you are over 50 years of age.

Women whose mother, aunts or sisters have had breast cancer may have a higher risk of getting breast cancer.

If you had breast cancer already.
What affects my risk of getting breast cancer?

Taking the pill.

Using HRT.

Starting your periods at an early age
What affects my risk of getting breast cancer?

- Having a late menopause
- Having no children or having children later in life.
What affects my risk of getting breast cancer?

Drinking more than one standard drink per day.

If you are overweight with a BMI of over 25.

Doing less than 30 minutes of physical activity 5 times a week.
Breast care - self checking
Breast care- self checking

It is very important that women check what their breasts feel like at different times of the month.

This is because the menstrual cycle makes changes in the breasts.

You need to know what is normal for you so you will notice any changes.
Breast care- self checking

Every woman’s body is different.

Some women have one breast larger than the other- this is ok.

It is best to check your breasts whilst looking in the mirror to see if anything looks different.
Breast care- self checking

Check your breasts while you are somewhere private like in the shower.
How to check your breasts
How to check your breasts

Feel all over the breast.

Then feel around the nipple area.

Then feel under your arms.
Changes to look out for
Changes to look out for

If you find changes in your breasts it is very important to see your doctor at once.

You can ask to see a female doctor if you prefer.
Changes to look out for

Lump or thickening in your breast.

Lump or thickening in your armpit.

Any liquid leaking from your nipples.
Changes to look out for

- Pulling in of nipple.
- Nipple in different place.
- Rash on nipple.
Changes to look out for

Changes to skin on breast – redness.

Change in size or shape of breast.

Changes in shape of breast or nipple.
Changes to look out for

Pain in one breast or armpit.

Changes to skin on breast - dimpling.
Breast screening
Women aged over 50 will be sent a letter from BreastCheck to invite them to come for a mammogram.

A mammogram is an x-ray of your breasts. This will check if your breasts are healthy.

It is your choice if you want to go for a mammogram or not.
Breast screening

Mammograms can take place at hospitals or mobile units.

This is the mammography equipment used to take the x-rays of your breasts.

The radiographer is the person who takes the x-ray.
Mammogram

What happens?
Mammogram - what happens?

It is always female staff who do the mammogram.

You can bring someone along to support you.

The radiographer will talk to you about the mammogram.
You will be asked to undress from the waist up.

The radiographer will put your breasts one at a time between the plates and take the x-rays.

The mammogram will only take a few minutes.
Mammogram- what happens?

The radiographer will go behind a glass screen when the x-rays are being taken.

Some women find it painful or uncomfortable.
What happens next?
What happens next?

You will be sent a letter to tell you the results after a few weeks.

Sometimes you will be asked to come back for another mammogram.

Ask for support to find out why you have to have another test.
Cervical Cancer
Women can get cancer of the cervix.

The cervix is the opening at the bottom of your womb inside the vagina.
What affects my risk of getting cervical cancer?
What affects my risk of getting cervical cancer?

Human Papilloma Virus (HPV) is a very common infection that is passed on during sex.

If you smoke, it can prevent the infection clearing up.

Not having regular smear tests.
Cervical screening
All women between the ages of 25 and 60 are asked to go for a smear test.

You will be sent a letter inviting you to make an appointment for a smear test at your G.P.

It is your choice if you want to go for a smear test or not.
If you are aged between 25 and 44 it is a good idea to have a smear test every 3 years.

If you are aged between 45 and 60 it is a good idea to have a smear test every 5 years.

The smear test will be done by a nurse or a doctor.
Cervical screening

You can ask for a female nurse or doctor if you are embarrassed.

You can bring someone to support you as well.

If there is a history of cervical cancer in your family you should have a smear test regularly.
Smear test – what happens?
Smear test – what happens?

The doctor or nurse will talk to you about your health.

They will then ask you to take off your pants.

And then ask you to lie down on the examination bed.
It is very important to try to relax and not worry during the smear test.

The doctor or nurse will use a **speculum** to open up your vagina so that they can see your cervix.

The doctor or nurse will use a small brush to take a sample of cells from your cervix.
Smear test – what happens?

That is it! You will be asked to get dressed again.

The cells that are collected on the brush will be sent for testing.
What happens next?
What happens next?

You will be sent a letter to tell you the results after a few weeks.

The letter may tell you that the test showed that everything is OK.

Sometimes you will be asked to come back for another test.
What happens next?

This might be because the test did not work properly.

Or it might be because the test shows that something is wrong.

Ask for support to find out why you have to have another test.
Changes to look out for
Changes to look out for

You need to go to your doctor as soon as possible if you have any of these symptoms:

- Bleeding between periods.
- Thick or smelly discharge from your vagina.
Changes to look out for

Pelvic pain.

Bleeding or pain during or after sex.

Any bleeding after you have had the menopause.

EMBRACES – ID SESSION 1 – TWO HOUR SESSION

Introduction to the programme (20 minutes)

10 minutes: Why are we here? Introductory session for the group. (Group activity)

- Put relevant icon on the flipchart when discussing that topic. (Repetition of key concepts)
- Flipchart to record ideas, key message we are healthy women here to learn about cancer and the tests to check for cancer.

10 minutes: Ground rules help the group to create a safe and comfortable place to learn enables the classes to be completed efficiently. (Group activity)

Suggested ground rules

- Start on time
- Allow each person time to talk
- Don’t interrupt
- Keep on the topic
- Laughter is OK
- Be open minded
- Take chances
- Don’t be afraid of mistakes
- Ask for help when you need it
- Give people positive feedback
- Listen
- Keep what is said private
- No comment is stupid
- Its ok to disagree respectively
- If someone disagrees with you don’t take it personally
- Each person is in charge of their own learning (take breaks, ask questions, the right to pass)
Introduction to cancer (30 minutes)

20 minutes: What is cancer?

Facilitator: In the next few weeks we are going to learn about health and certain kinds of cancer that women get called breast and cervical cancer (use the anatomically correct doll when discussing the body parts)

If these terms are unfamiliar don’t worry, we will explain these terms in our classes.

Raise your hand if you have heard of cancer.

Group activity: What types of cancer have you heard of? Some of you might even have known somebody who has cancer (Use flipchart board to record the answers)

Facilitator: EMBRACES PROGRAMME BOOKLET Pages 4-11 – providing accessible information about what cancer is.

10 minutes Cell growth activity (Group activity)

Facilitator: Let’s place a piece of yarn on the floor in a circle, the size of a small hula hoop.

Let’s pretend each of us is a cell in the breast. One person pretends to be a cell in the breast and stands inside the yarn circle. Have the next person stand in the yarn circle (breast). Then the next person gets in the circle. Eventually there will be too many people that can fit into the circle (make the circle small enough so that all students cannot fit).

This is how cancer works. It grows and grows and sometimes it won’t stop unless a doctor can help with medicine or other treatments.

Have women sit down once everyone has tried to fit in the circle.

Does anyone have any questions about cancer?

Spotting cancer early (15 minutes)

Facilitator: Cancer is when parts of the body have lumps that won’t stop growing.

Breast and cervical cancer can be serious but can be treated if found early by a doctor...
You can’t tell by looking at someone that they have cancer - only a doctor can tell with tests

It is important for women to get mammograms and smear tests to look for breast and cervical cancer. This is called breast and cervical cancer screening.

**Staying healthy (25 minutes)**

**10 mins Brain storm (group activity)**

We are here today to begin learning what it means to be a healthy woman. What does it mean to be a healthy woman - record answers on the flipchart, ensure each item is discussed with the group.

- Feeling good
- Not being sick
- Everything is working alright
- Wear a seatbelt when in the car
- Wear sunscreen
- Wear a helmet when riding a bike
- Brush your teeth twice a day
- Go to the doctor when you are sick
- Go to the doctor for regular check ups
- Take medication regularly when the doctor told you
- Get regular screening such as breast and cervical screening.
- Don’t smoke
- Don’t drink alcohol
- Eat healthy foods - name some
- Eat foods low in salt sugar and fat
- Don’t eat too much fried food
- Healthy snacks
- Three meals a day
- Eat slowly
- Be physically active - name some activities

**15 mins EMBRACES booklet 15-22.**
Facilitator discusses the changes you can make in your life to stay healthy, repetition of the key ideas given by the women.

**Building advocacy skills – (10 minutes) (SCT-Self-efficacy) (Group activity)**

**Keeping healthy**

The facilitator will read out each scenario. The facilitator then asks ‘What would you do?’

- You want to do something healthy but don’t know what to choose.
- You want to lose some weight but don’t know where to start.
- Someone offered you a beer to drink but you wanted to say NO.
- Someone offered you a cigarette to smoke but you wanted to say NO.
- You think it’s time for a smear test.
- You think it’s time for a mammogram.

Think about what you would do if you had one of these problems and then say what you would do to ask for help. It’s okay if you don’t know how to do this or feel shy because we will help you along the way. The class members then share their ideas.

**Relaxation technique (10 minutes) (Suggested music Bach Air on a G string)**

Facilitator Breathing: Your breathing is relaxed when it is slow and regular (SCT-**Modelling**). It is not relaxed if it is rapid or if there are interruptions such as coughing, yawning, sneezing, sniffling or talking. Place one hand on your stomach, and one hand on your chest, sit back in your seat with your legs on the ground, close your eyes and breathe in through the nose and out through the mouth like you are smelling a flower. If in a wheelchair practice the same breathing technique.

Please show me how you can do relaxed breathing. Do the best you can.

Feedback for each person

Positive: Notice the relaxed feelings in your chest as you breathe in in a relaxed way.

Corrective: You need to breathe slowly like this (SCT-**Modelling and reinforcement**) Please take a deep breath slowly when I say ‘in’ and breathe out slowly when I say ‘out’

Good job
**Setting Jobs for Health (10 minutes)**

Every week we will have a job to do before the next group meeting. It is to help everybody to practice some of the things we learned in class at home. Weekly record chart in EMBRACES booklet.

This week our job for health is practicing the relaxation technique.

Close the session by thanking everyone for attending. Ask if there are any questions. Remind everybody to do their jobs for health and the next class date, time and location.
EMBRACES- ID SESSION 2 – TWO HOUR SESSION

Welcome everybody to EMBRACES again

Time: 5 minutes
Briefly highlight the ground rules posted on the board where everybody can see
Ask if anybody has any questions, additions or changes.

Review
Time: 5 minutes
Review agenda and key messages from last class. Place laminated icons on the board for this week’s topics
- Breast cancer
- Breast care self-checking
- Changes to look out for

Things that make women special (group activity)
Time: 10 minutes:
Materials: Anatomically correct doll
Steps: We are all in this class for one reason. We want to keep ourselves healthy. Let’s talk about what makes women’s bodies special
Show the doll, undress the doll. Ask the group what they think makes the woman’s body different from a man. Use the doll throughout to alleviate embarrassment, some women may like to hold the doll.

- Women have periods
- Women can have babies
- Women can breastfeed babies
- Women have a vagina rather than a penis
- Women have smooth faces rather than beards or moustaches
- Some women have curvy bodies

Invite the class to give as many answers as they can think of but make sure the above are included. Record answers on the flipchart.
Breasts

Time: 10 minutes

Materials

- Breast chart/poster
- Breast anatomy handouts
- Crayola twistables
- Anatomically correct female doll

Procedure

- Let’s talk about our breasts now.
- Let’s look at the poster and see if we can name some of the parts.
- As we look at the poster and see if we can name some of the parts
- There are crayons on the table

Breast parts

Facilitator: The areola is the big round circle in the centre of the breast. It might be pink or brown.
The nipple is the raised part in the centre of the areola.
The milk glands make milk when a woman has a baby. The baby can be breast fed from the mother’s breast.
Fat is all around the breast and makes it feel soft.

What colour should we make these parts on our handout?
Have the group agree on colours for the four main parts of the breast.

How do you take care of your breasts?
- Wash underneath them and dry carefully afterwards
- Wear the right size bra

There are some problems we can take care of ourselves, like a bra that does not fit. Like if there is something that is not normal for our bodies like a lump, we need to go and tell the doctor.
Breast Cancer and risks of breast cancer (EMBRACES booklet pg 25-29)
Time: 10 minutes
Class discussion about breast cancer and the risk factors for breast cancer

Breast care self checking- know what is normal for you (EMBRACES booklet pg 30-33)
Time: 10 mins
Materials booklet, DVD from Embarrassing bodies (3 mins 42 secs)

Facilitator: It is your job to take care of your health. It is okay for you to look at your breasts in the mirror and to press them with your fingers when you are in a private place like your bedroom or in the shower, to learn what they normally feel and look like. Everybody’s breasts are different. It is important to know what is normal for your breasts and what is the same about them every time you touch or look at your breasts. If you notice something different, you should see your doctor straight away.

Play DVD for the group, open up short group discussion about knowing what is normal for you, how you breasts should look and feel. Encourage all participants to take part in the discussion

How to check your breasts (EMBRACES booklet pg 34-35)
Time 10 mins
Materials
- Breastology® bag
- Health Edco® Breast Self Examination model
Facilitator demonstrates how to check the breast models for the group. Have each the women feel the breast models and feel the lumps (SCT- Modelling and direct experience)

Changes to look out for (EMBRACES booklet page 36-41)
Time 10 minutes
Facilitator: Using the booklet introduce the Cancer Research UK 11 signs of breast cancer to the group.
Facilitator: Encourage them to feel their breasts in a private place like the bedroom or bathroom or in the shower. Look in the mirror at their breasts. Look for any changes (SCT - Reinforcement). Always contact a doctor if you feel or see something different (early medical help seeking)

Adapted talking mat activity- breast cancer signs and symptoms (Group activity)

Time: 10 minutes
Materials required
Yes (green tick), no (red x) and don’t know (grey question mark) laminated pictures;
Flipboard;
Magnets;
Possible signs and symptoms of breast cancer, laminated A4 sheets from EMBRACES booklet pg 35-38.

Facilitator: Has anybody ever played this game
Yes- you should go to your doctor as soon as possible
No- Hold up the no sign if you should stay at home

Instructor reads the statements, each woman has an opportunity to agree, disagree, or say she doesn’t know in this activity. Where a don’t know symbol is shown by any of the group, the sign or symptom is once again discussed to enhance the woman’s understanding of the symptom and that it may be a sign or symptom of breast cancer which needs to be checked out by a doctor.

Possible signs and symptoms of breast cancer (EMBRACES booklet pg 36-41)

Unlikely signs and symptoms of breast cancer
- A cold breast that doesn’t get warm
- Smooth skin on the breast
- Small breasts
- A darker circle around the nipple
- Sagging breasts
- Breasts that don’t fit in your bra
• Having milk in your breasts after you have a baby.

**Papier Mache Activity to make breast models (Group activity)**

**20 minutes**

Materials required

Small balloons slightly inflated to around B/ C cup size

Newspaper

PVA Glue/ water

Bowls

Paintbrushes with easy grip handles

Plastic cups to hold the model

Each participant layers the newspaper onto the balloon, if she wishes, to make a model of the breast. This group work activity is designed to encourage discussion about the breasts, to normalise the discussion and to remove embarrassment when discussing the breasts. This may impact on early medical help seeking on the discovery of a sign or symptom of breast cancer.

**Building advocacy skills – (SCT- Self-efficacy)**

Time:10 minutes

Talking to the doctor about what’s wrong with your breast.

During this course we will try to solve some problems that may come up with your health. We will practice how to talk to the doctor about a health problem. How to advocate for yourself. It’s okay if you don’t know how to do this or feel shy because we will help you along the way. Okay let’s try some

The instructor will read each scenario. The instructor then asks- What would you do?

• While in the shower you felt a lump in your breast?
• While looking in the mirror at your breasts, you notice a dent in the side of your breast;
• Your breast is sore in one place;
• You felt liquid on your breast coming out of your nipple.

Relaxation technique (5 minutes) (Suggested music Bach Air on a G string)

Facilitator Breathing: Your breathing is relaxed when it is slow and regular (SCT-Modelling). It is not relaxed if it is rapid or if there are interruptions such as coughing, yawning, sneezing, sniffling or talking

Please show me how you can do relaxed breathing. Do the best you can.

Feedback for each person

Positive: Notice the relaxed feelings in your chest as you breathe in in a relaxed way.

Corrective: You need to breathe slowly like this (SCT-Modelling) Please take a deep breath slowly when I say ‘in’ and breathe out slowly when I say ‘out’ Good job (SCT- Positive reinforcement)

Setting Jobs for Health (5 minutes)

Every week we will have a job to do before the next group meeting. It is to help everybody to practice some of the things we learned in class at home.

This week our job for health is practicing the relaxation technique – weekly record chart in EMBRACES booklet.

Close the session by thanking everyone for attending. Ask if there are any questions. Remind everybody to do their jobs for health and the next class date, time and location.
Welcome everybody to EMBRACES again

Review

Time: 10 minutes
Briefly highlight the ground rules posted on the board where everybody can see
Ask if anybody has any questions or concerns from the last class.
Let us take a look at what we did in the last class
How can you know what is normal for your breasts?
Does anybody have any questions?
Tell me about your Job for Health? What challenges did you face?
Thanks for sharing

Breast Screening including video clip (30 minutes)

Time: 20 mins EMBRACES- ID booklet pgs 42-50.
Facilitator put icons for this week on the flipchart. This week’s topics are
Breast screening- explaining the purpose of breast screening (10 minutes)
Mammogram – what happens? Explanation of what happens during a breast screening appointment (5 minutes)
What happens next? Dealing with results and repeat testing (5 minutes)

DVD Breast screening procedure

Time: 10 minutes
Short video clip about a woman having a breast screening (Breast check mammography DVD)

Getting Screened 10 minutes (group work)

Time: 10 minutes
Materials required
Laminated pictures in kit;
Flipchart;
Yes (green tick), no (red x) and don’t know (grey question mark) laminated pictures.
Facilitator reads the statements, each woman has an opportunity to agree, disagree, or say she doesn’t know in this activity. Where a don’t know symbol is shown by any of the group, the statement is once again discussed with the group to enhance the woman’s understanding of the purposes of breast screening and the screening appointment.

Statements to be read out in conjunction with the laminated picture from the kit.

- Any woman can get breast cancer, even women with disabilities.
- A mammogram can save your life
- A mammogram is an x-ray of your breast. It checks if your breasts are healthy.
- It’s important to get a mammogram when you turn 50 it can save your life.
- You can bring someone along to support you when you get your mammogram.
- After you have made the appointment, plan on how you will get there. Ask staff, a friend or family.
- Wear a top, as you will be asked to undress form the waist up.
- Don’t wear deodorant when you get your mammogram, it can block the x-ray. You can wear deodorant after the mammogram.

**Breast cancer awareness Beaded Necklace**

**Time: 20 minutes**

**Materials**

- Beaded necklace©
- Breast models
- Breast model with common pathologies

**Procedure**

1. Show the women the breast model and allow each woman to feel a lump inside the breast. Facilitator: Mammograms caber find the smallest lumps, ones that are so small your fingers can’t even feel. A mammogram can save your life by finding cancer very early (key learning point- repetition to encourage early help seeking either on the discovery of a sign or symptom of breast cancer or by a screening procedure).
2. Next show the breast cancer awareness beaded necklace. Look at the different sizes of the lumps, focusing on the smallest lumps that can be found by a mammogram (Repetition of key concept) (SCT modelling).

3. Groupwork- allow the women to touch the beads to help to identify which size lumps can be found by a mammogram, by self exam, a doctor etc. The smaller the lump found, the easier it is for the doctor to make the lump go away (SCT-Reinforcement of the purpose of screening).

**Colouring activity (group activity)**

**Time:** 10 minutes

**Materials:** Individual activity sheet

- Pink twistables
- A1 size poster of the activity sheet to act as a guide for the activity

**Facilitator:** Colour the size of the lump that can be found by regular mammogram. There is more than one, using the cancer awareness beaded necklaces to reinforce the concept (SCT-Reinforcement).

**Building advocacy skills – (SCT- Self-efficacy)**

**Time:** 10 minutes

During this course we will try to solve some problems that may come up with your health. We will practice how to talk to the doctor about a health problem, how to advocate for yourself. It’s okay if you don’t know how to do this or feel shy because we will help you along the way. Okay let’s try some

The facilitator will read each scenario. The facilitator then asks ‘What would you do?’

- Your breasts hurt when the radiographer touches them
- When the radiographer asks you to hold your breath, you don’t know how long to hold your breath.
- At your yearly doctor’s appointment, the doctor says women with disabilities don’t need to get a mammogram. You know this is not right?
- You feel embarrassed taking off your top to get a mammogram.
Papier Mache Activity to make breast models (Group activity)

Time: 20 minutes

Materials required

Small balloons slightly inflated to around B/ C cup size covered with papier maché in Week 2

Bowls

Water

Paintbrushes with easy grip handles

Poster paints

Plastic cups to hold the model

Small pom poms

PVA glue

Each participant paints the papier mache breast model, if she wishes, skin tone on the breast with the areola painted darker, small pom poms can be glued on to represent the nipple. This group work activity is designed to encourage discussion about the breasts, to normalise the discussion and to remove embarrassment when discussing the breasts. This may impact on early medical help seeking on the discovery of a sign or symptom of breast cancer.

Relaxation technique (5 minutes) (Suggested music Bach Air on a G string)

Facilitator Breathing: Your breathing is relaxed when it is slow and regular (SCT-Modelling). It is not relaxed if it is rapid or if there are interruptions such as coughing, yawning, sneezing, sniffling or talking

Please show me how you can do relaxed breathing. Do the best you can.

Feedback for each person

Positive: Notice the relaxed feelings in your chest as you breathe in in a relaxed way.
Corrective: You need to breathe slowly like this (SCT-Modelling). Please take a deep breath slowly when I say ‘in’ and breathe out slowly when I say ‘out’. Good job (SCT-Positive reinforcement)

**Setting Jobs for Health (5 minutes)**

Every week we will have a job to do before the next group meeting. It is to help everybody to practice some of the things we learned in class at home.

This week our job for health is practicing the relaxation technique – weekly record chart in EMBRACES booklet.

Close the session by thanking everyone for attending. Ask if there are any questions. Remind everybody to do their jobs for health and the next class date, time and location.
EMBRACES- ID SESSION 4 – TWO HOUR SESSION

Welcome everybody to EMBRACES again

Review

Time: 5 minutes

Put up icons for today’s class on the flipchart
Briefly highlight the ground rules posted on the board where everybody can see
Ask if anybody has any questions or concerns from the last class.
Let us take a look at what we did in the last class
Does anybody have any questions?
Tell me about your Job for Health? What challenges did you face?
Thanks for sharing

What is cervical cancer (20 minutes)

Time: 5mins

Topic: What is cervical cancer? EMBRACES-ID booklet pg 52- short explanation of what cervical cancer is, and an introduction to the anatomy of the body re the cervix.

Time: 5 minutes

Using the pelvic section to for repetition of the anatomy of the woman’s body ie the location of the cervix (SCT - Direct experience and reinforcement)

Time 10 minutes – Female reproductive system colouring activity (Group activity)

Materials
Individual activity sheets
Twistables
A1 poster of the activity sheet to guide the activity

What affects my risk of getting cervical cancer?

Time: 5 minutes

EMBRACES – ID booklet pg 54; key risk factors for cervical cancer as per Irish Cancer Society Guidance
**Cervical Screening**

**Time: 15 minutes**

EMBRACES- ID booklet pg 55- 58

Health Edco Cervical feel it yourself model (*SCT- Modelling and direct experience*)- shows different stages of cervical cancer progression which can be seen via the screening procedure. Each of the women gets the opportunity to look at the cervix close up from normal to invasive cancer. This is to reinforce the importance of regular smear tests to prevent the risk of cervical cancer developing.

**Smear test what happens/ and what happens next**

**Time: 15 minutes**

EMBRACES-ID booklet pg 59-62.

Speculum, brush and bottle (*SCT- Direct experience*). Each of the women get the opportunity to look at and feel the equipment used for the cervical screen. The pelvic model is use to repeat the procedure for the cervical smear. If preferred, the procedure can be replicated on the A1 poster of the female anatomy.

Short discussion about getting the results of a smear test, and the possibility that you may be called back for a repeat test because of an abnormal result.

**Changes to look out for (10 minutes)**

**Time: 10 minutes**

Possible signs and symptoms of cervical cancer (EMBRACES booklet pg 66-68)

**Adapted talking mat activity-cervical cancer signs and symptoms** (Group activity)

**Time: 10 minutes**

Materials required

Yes (green tick), no (red x) and don’t know (grey question mark) laminated pictures; Flipboard;
Magnets.

Possible signs and symptoms of cervical cancer laminated A4 images from EMBRACES booklet pg 66-68
Facilitator: Has anybody ever played this game
Yes- you should go to your doctor as soon as possible

Instructor reads the statements, each woman has an opportunity to agree, disagree, or say she doesn’t know in this activity. Where a don’t know symbol is shown by any of the group, the sign or symptom is once again discussed to enhance the woman’s understanding of the symptom and that it may be a sign or symptom of cervical cancer which needs to be checked out by a doctor.

Some things that make it hard for women to get cervical screening (group activity)
Time: 15 mins
Brainstorm and record answers on the flipchart
Sample responses include
- Feeling embarrassed
- Feeling scared
- Worried about wasting the doctors time
- The doctor would be difficult to talk to
- It would be difficult to get an appointment with the doctor
- Too busy to make an appointment
- Hard to get an appointment
- Too many other things to be worried about
- Difficult to get transport to the doctors surgery
- Would feel confident talking about the symptom with the doctor
- Dislike being examined by male doctors
- Believe they won’t get cancer
- Do not have any symptoms
- Worried about what the doctor will find

Women’s attitude about going for screening - Jo’s Cervical cancer Trust
Time: 5 mins
Short video clip from Jo’s cervical cancer trust to reinforce for the women with intellectual disabilities that many women are apprehensive and do not want to participate in the screening
programme. However, many women do have the procedure. (SCT -Modelling and building experience of the procedure)

**Building advocacy skills – (SCT- Self –efficacy) (Group activity) (10 minutes)**

Time: 10 minutes
During this course we will try to solve some problems that may come up with your health. We will practice how to talk to the doctor about a health problem, how to advocate for yourself. It’s okay if you don’t know how to do this or feel shy because we will help you along the way. Okay let’s try some

The facilitator will read each scenario. The facilitator then asks ‘What would you do?’
- You don’t want to go to a male doctor
- You don’t know where to go to get your screening
- You don’t know who could go with you to your appointment

Think about what you could do if you had one of these problems and then say what you would do to ask for help. The class members then share their ideas.

**Relaxation technique (5 minutes) (Suggested music Bach Air on a G string)**

Facilitator: Your breathing is relaxed when it is slow and regular (Model). It is not relaxed if it is rapid or if there are interruptions such as coughing, yawning, sneezing, sniffing or talking

Please show me how you can do relaxed breathing. Do the best you can.

Feedback for each person

Positive: Notice the relaxed feelings in your chest as you breathe in in a relaxed way.

Corrective: You need to breathe slowly like this (SCT-Modelling). Please take a deep breath slowly when I say ‘in’ and breathe out slowly when I say ‘out’ Good job (SCT-positive reinforcement).
Certificate presentation (10 minutes)

Presentation of Certificates of Attendance at the EMBRACES-ID programme to promote the women’s self-efficacy in attending the programme to learn about their health and advocacy skills to become more active participants in their own health care decisions.
AVI.4 EMBRACES-ID video clips and anatomy posters

Video clips from Channel 4, Jo’s Cervical Cancer Trust and NHS

Breast poster (Size A0)

Cervical poster (Size A0)
AVI.5 EMBRACES-ID Participation Certificate

Certificate of Participation

Awarded to
