All: 1 Review: 0

1: [Mol Reprod Dev](#), 2007 Aug 21; [Epub ahead of print]

Immunolocalization of the High-Mobility Group N2 protein and acetylated histone H3K14 in early developing parthenogenetic bovine embryos derived from oocytes of high and low developmental competence.

[Bastos GM](#), [Gonçalves PB](#), [Bordignon V](#).

Laboratory of Biotechnology and Animal Reproduction—BioRep, Federal University of Santa Maria, Santa Maria, RS, Brazil.

This study investigated differences in the distribution of acetylated histone H3 at Lysine 14 (H3K14ac) and the High-Mobility Group N2 (HMGN2) protein in the chromatin of early- (before 24 hr) and late-cleaved (after 24 hr) bovine embryos derived from small- (1-2 mm) and large-follicles (4-8 mm). The

Challenges for Autonomic Network Management

Challenges for Autonomic Network Management.

Agoulmine, N. and Balasubramaniam, Sasitharan and Botvich, Dmitri and Strassner, John and Lehtihet, E. and Donnelly, William (2006) In: 1st IEEE International Workshop on Modelling Autonomic Communications Environments (MACE).

PDF - Requires a PDF viewer such as [GSview](#), [Xpdf](#) or [Adobe Acrobat Reader](#)
570Kb

Abstract

The improvement in the management capabilities and available bandwidth offered by next generation of networks is accelerating the development of a new kind of applications, interfaces and services. The ultimate goal of such networks is to automatically adapt their services and resources in accordance with changing environmental conditions and user needs. Such 'autonomic' capabilities imply the usage of sophisticated technologies in order to integrate every object of our environment that would be enabled with important computational power and storage capabilities. The challenge behind such implementation is to simplify the administrators' task by automating the decision making process, and enabling the users to seamlessly find their way in such pervasive environments. This paper gives an overview of the different architectures that support the design, implementation and deployment of autonomic systems.

Hi, I'm Ian Mulvany.

I just moved into London with Gioia. We had a new year's eve party and the party invitation was [here](#).

You can read my blog [patiallyattended](#) hosted by vox.

some pictures
